

WM CAPITAL PRESENTS COVID BOX AND ISLAND OF HEALTH TO THE MARKET

Covid Box, thanks to the use of applied biometric technologies, allows you to carry out a quick and totally safe Sars-Cov2 health screening by healthcare professionals
Isola della Salute, a derivative product of the Box della Salute, consists of a mobile station that can be easily transported to all places where basic health care and prevention against Sars-Cov2 is needed.

Milan, 19 november 2020

WM Capital S.p.A. (“**WM Capital**” or the “**Society**”), company listed on AIM Italia, announces that, as part of the marketing and development activities of Box della Salute, today presented to the market Covid Box, the new modular system designed specifically for the screening of Sars-Cov2 and Isola della Salute, structure completely mobile that incorporates the main functions of Box della Salute and Covid Box.

Both solutions, which allow the execution of rapid swabs, have been designed to meet the provisions already adopted by the Government to manage the current epidemiological situation and therefore provide support and integrate with the territorial health units to carry out the control, monitoring and the traceability of Sars-Cov2.

Specifically, Covid Box also uses biometric technologies, i.e. contactless systems for the recognition of the user with a passport or identity card, detection of the main vital parameters (body temperature, heart and respiratory rate), the carrying out of pre-triage questionnaires with the voice or eye movement.

Isola della Salute, as an extension of Box della Salute, also allows you to perform a large set of medical tests such as blood pressure, ECG, body composition, dermatoscopy, otoscopy, combining the presence of the doctor, even at a distance, with 'need for prevention in support of the territories.

For these characteristics Covid Box and Isola della Salute, whose construction has benefited from the European Patent No. EP19712044.7 called Self Diagnostic System, ready for marketing, can be installed in the main transit areas such as pharmacies, airports, shopping centers, stations., doctors' offices, universities and hospitals.

The presentation event, via teleconference, saw the participation of Dr. Franco Perona, specialist in radiodiagnostics, former professor at the University of Genoa and currently CEO of CeMeDi, clinic of the Lifenet Healthcare hospital group and medical-scientific partner of Box della Salute.

The registration of the event can be used on the Facebook page of the Box della Salute at the link <https://www.facebook.com/profile.php?id=100057202279310>, and will also be available in the next few hours on the website www.boxdellasalute.com.

Fabio Pasquali, CEO of **WM Capital S.p.A.**, who illustrated the project in the online presentation event, commented: "The solutions we present today are the result of the verticalization that we have implemented in such a delicate period to respond to the emergency and help individuals and public administrations in prevention and in contrast to Sars-Cov2. However, the studies and researches of these years remain based on the use of Covid Box and Isola della Salute (extension of the Box della Salute) in normal operating conditions, so much so that due to their design structure they can be quickly converted and carried out prevention and wellness activities".

The press release is available on www.wmcapital.it and www.boxdellasalute.com

WM Capital (WMC:IM), company specialized in the creation and development of Business Format Franchising and innovative SMEs since 2017, supports companies in their growth process by external lines through the development of franchising systems in Italy and abroad, conferring industrial and operational know-how and providing available a qualified network of international operators.
